

Emergency Traffic Control System

The On Demand Emergency Signal is specifically designed to allow immediate highway access for Fire and Rescue Vehicles. Incorporating state of the art technology, the On Demand system meets the new revision to chapter 4F.04 of the Federal Manual for Uniform traffic Control Devices (MUTCD).

The initial investment is cost-effective (less than 1/2 of a traditional traffic control system), and being solar powered, there is no recurring monthly electrical expense. Contact us to find out more about how we can implement the On Demand Emergency Signal for your Firehouse.
